

Magneto® Tech Surround.

- Aluminum frame
- Thin, metal panel sheets
- Six panels total - Up to five 4' panels across or four across and two deep
- Easy hand tighten hex screw assembly
- Either a left or right hand return simply by flipping it over (v2 will be capable of both)
- Panel sheets are held in place by magnets. Easy removal if you need to access behind, but strong enough not to be bumped off by accident

The case it rides in

Panel sheets in the thinner slots on the left and panel frames on the right.

Return 1 and panel 1 will always be the start

Easy through bolt assembly

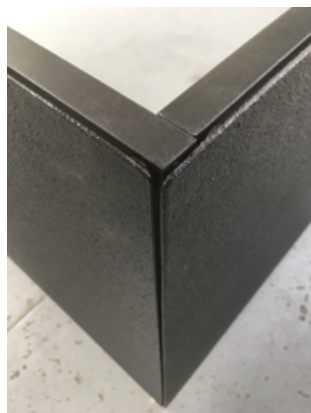

Remove the next bolts and add panel 2

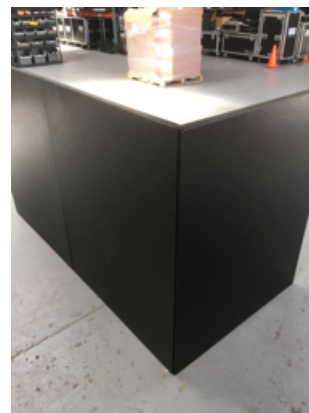

Line up your sheet on the bottom and lift into place

Like so

Return 1 frame is shorter to allow overlap on the corner

Finished product with a left hand return

Bolts will need to be returned on strike so the door can close
