

## Wireless Spears

The big changes:

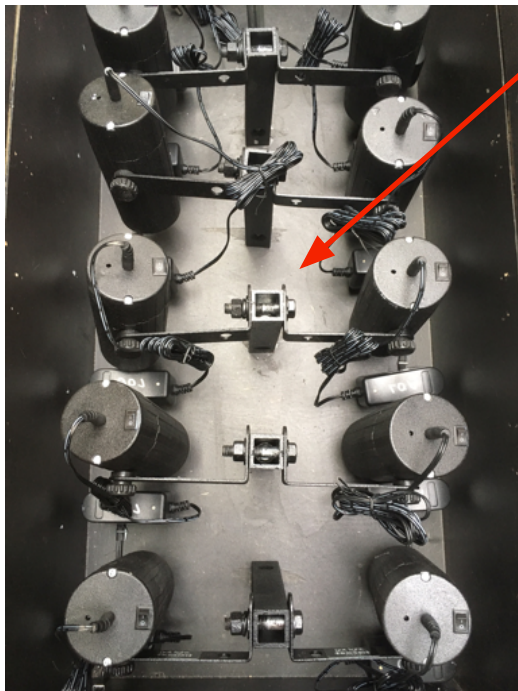

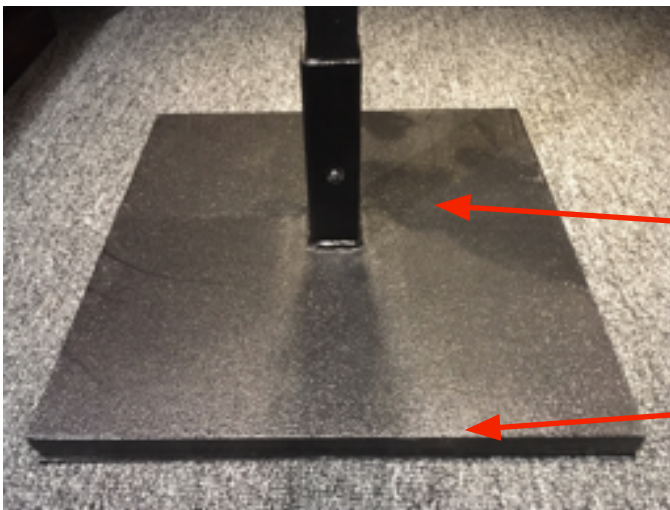

- No battery
- No cable
- No soft goods
- Duel Pinpoint Go with a runtime of 9 hours

The head clicks into the pole in the same manner as the current spears.

The poles now fits in the bases with the same pin/hole connection as the head.

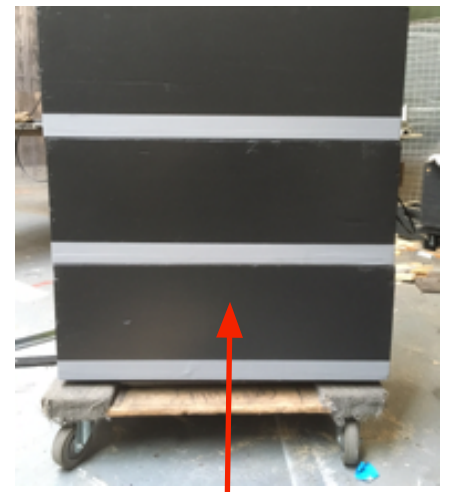

Base is almost twice as thick for stability since there will no longer be a battery to weight it down.

Same travel box for six heads but now with wiring for overnight charging on holdovers.

They will arrive to events plugged in from charging.

Please plug them back in during strike for quick flips.

Wireless spear head boxes will have a gray stripe to identify them from the p16 heads.
