

URCHIN ASSEMBLY

4' urchins (made with 2' LED tubes, 140w total) come fully assembled

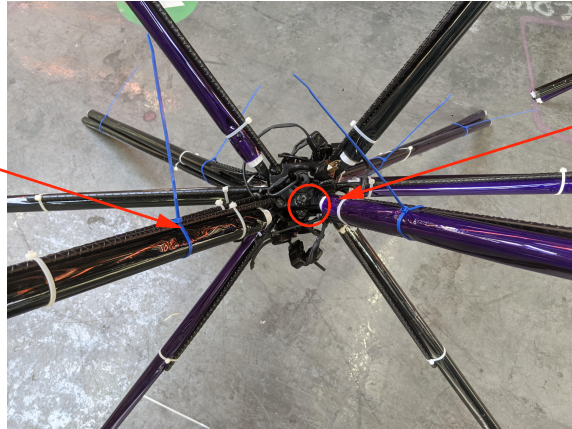

Travels like this

8' urchins (made with 4' LED tubes, 280w total) will travel with 4 legs unattached and zip tied to other legs

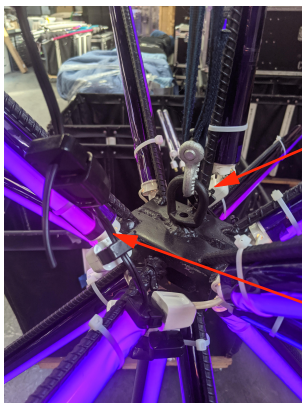

Looks like this when assembled

To assemble - cut the BLUE zip ties on all 4 legs...

...and screw the newly released rebar into the exposed threads on the side

All urchins hang from this central pick point...

...and are pre-wired together with zip + add-a-taps - there will be a male end free near the top
